

## Hot Chili Limited Work Programmes Commence

**Hot Chili Limited (“the Company” or “Hot Chili”) is pleased to confirm that its exploration team has commenced work programmes at the company’s two advanced projects Productora and Los Mantos.** Work being undertaken involves litho-structural mapping, surface geochemical and radiometric sampling and drill programme site mark-outs.

The preliminary programmes at Productora and Los Mantos will facilitate the commencement of a maiden 25,000m RC and diamond drilling programme which the Company hopes to commence as soon as possible. Regulatory drilling applications have been submitted and are currently being progressed.

The initial stages of the maiden drilling programme will involve confirmatory drilling of approximately 5,000m. The remaining 20,000m will be directed towards definition drilling over known areas of uranium-copper-gold mineralization identified from previous drilling and existing mine development.
