

Quarterly Report

Period Ending June 30th 2020

Highlights

Lease mining commences at Productora copper project

Mining Commences at Productora Four Months Ahead of Schedule

- Recent increases in copper and gold prices has seen lease mining commence four months ahead of schedule at the Company's Productora copper-gold project in Chile
- Expected Revenue of A\$1.4 to A\$1.8 million per annum to Hot Chili
- Discussions underway to expand the scale of the Lease Mining and Processing Agreement with Chilean government agency ENAMI

Drilling Re-Commenced at Cortadera

- Drilling operations re-commenced at the company's flagship Cortadera copper-gold discovery, 14km from Productora
- New diamond drilling at the Cortadera porphyry discovery records wide zones of strong mineralisation - high grade copper-gold core expected to grow significantly, results pending

Maiden Resource Estimates Being Finalised

- Cortadera and San Antonio maiden resource estimates nearing completion
- Metallurgical testwork programme and internal scoping studies to assess various large combined copper-gold production scenarios advancing well
- Hot Chili aiming to define a large-scale, long-life, open pit and underground mine development from its coastal copper hub in Chile

Strengthened Funding

- Completion of a A\$8.9 million Placement and Entitlements Offer to shareholders

SUMMARY OF ACTIVITIES

Mining Commences at Productora Four Months Ahead of Schedule

First Mining at Santa Innes Underground Mine, 22nd July 2020, Productora project

In late July, the Company announced that lease mining at its Productora copper project in Chile has commenced well ahead of schedule. Hot Chili has achieved this milestone with the requirement for capital or operating cost.

The Company is very pleased with the speed in which its partner, Chilean government agency ENAMI, has moved to appoint an experienced local mining group and coordinate necessary approvals for mining at Productora.

In addition, the Company confirmed that it is in discussion with ENAMI to expand the scale of the existing 120,000 tonne per annum Lease Mining and Processing Agreement at Productora.

As outlined in the company's announcement to the Australian Securities Exchange on 2nd June 2020 "Mining and Processing Agreement Executed with ENAMI", the formal agreement with ENAMI involves:

- Two-year concession for lease mining and processing approximately 120,000 tonnes per annum of ore through ENAMI's Vallenar plant (located 15km north of Productora) over a two-year period with an option to extend the agreement by a further year
- Productora joint venture company (Hot Chili 80%) to be paid US\$2 per tonne ore processed and a 10% royalty for the sale value of extracted minerals

Lease mining will benefit from two existing underground mines at Productora (Santa Innes and Productora), with depletion of Hot Chili's existing 167M tonne JORC compliant open pit reserve not considered material.

Given current spot prices of approximately US\$2.95/lb copper and US\$1,840/oz gold, projected annual revenue to Hot Chili from the ENAMI agreement at Productora is expected to be approximately A\$1.4 million to \$1.8 million per annum - based on 120,000 tonnes per annum and targeted annual head grade of 1.4% copper and 0.3g/t gold.

The Company will also gain important mining and processing reconciliation data for high grade ore at Productora.

Drilling Re-Commences at Cortadera

On 18th June, Hot Chili announced that diamond-drilling had re-commenced at the Company's flagship Cortadera discovery in Chile.

Hot Chili plans to drill six diamond holes targeting high grade growth, with the first four of these planned to test areas identified for extending the high grade core at the main porphyry – Cuerpo 3.

Following the high grade growth drilling, the Company plans to step-out of the Cortadera discovery window to commence drilling several “bigger picture” targets which have been outlined in the larger Cortadera mineralisation footprint.

The first two diamond drill holes (CRP0016D and CRP0042D) have provided strong encouragement for continued growth of the high grade copper-gold core at Cuerpo 3.

Strongly mineralised porphyry has been observed over a broad 220m zone in recently completed drill hole CRP0016D. Mineralisation between 390m and 610m down hole depth comprised a visual estimate 1.5% - 3.0% chalcopyrite contained as fine dissemination and in association with +10% B-vein abundance. Visual estimates of sulphide minerals are not an accurate representation of expected assay value and are provided for indicative purposes only.

CRP0016D - a 350m diamond tail - was designed to test the potential for a significant up-dip extension to the southern flank of the high grade copper-gold core.

Diamond drill hole CRP0042D recorded approximately 330m of mineralised porphyry. Mineralisation between 618m and 954m down hole depth comprised a visual estimate 1.0% - 1.5% chalcopyrite contained as fine dissemination and in association with 1-5% B-vein abundance. Visual estimates of sulphide minerals are not an accurate representation of expected assay value and are provided for indicative purposes only.

CRP0042D was terminated early (in mineralisation) owing to significant deviation from its intended target and will be re-entered for a wedge hole at a later date.

Results for both CRP0016D and CRP0042D are pending.

Maiden Resource Estimates Nearing Completion

Figure 1. Long Section of the Cortadera discovery copper distribution model

No Mineral Resource estimate has been completed for Cortadera at this time. The image above of grade modelling do not represent an Exploration Target nor a Mineral Resource and should not be construed as such, in compliance with the JORC code.

The Company has made significant progress during the quarter towards the completion of first resource estimates for Cortadera and San Antonio.

Geological modelling and resource estimation workstreams are well advanced and the Company expects to release a maiden resource estimate for Cortadera shortly.

The maiden resource estimate for Cortadera incorporates all previous drilling undertaken prior to the current drilling programme which commenced this quarter on 18th June.

The current drilling programme is initially focussed on growth of high grade copper and gold within the 2.3km discovery zone and aims to facilitate a second resource estimate for Cortadera.

A preliminary metallurgical programme for Cortadera and San Antonio is progressing well with comminution testwork complete, and sulphide recovery flotation testwork and grind size optimisation complete and being compiled. Oxide leach testwork and ore characterisation studies are still ongoing.

Preliminary recoveries for copper, gold, silver and molybdenum are expected to be released for Cortadera and San Antonio in the coming weeks.

The Company anticipates the resource and metallurgical workstreams for Cortadera to be completed shortly to facilitate an assessment of various mine development scenarios later this year.

CORPORATE

Completion of A\$8.9 Million Placement and Entitlement Offer

During the quarter, Hot Chili successfully closed a A\$5 million private placement (Placement) and a parallel \$3.9 million non-renounceable Entitlements Offer of new shares, on a 3 for 20 basis

The shares were issued at AUD\$0.015 each with participants also entitled to one free-attached unlisted option exercisable at 2.5 cent each and expiring on 20th May 2022 for every two shares issued under the Placement and Entitlements Offer.

Veritas Securities acted as lead manager to the Placement and Entitlements Offer shortfall, which were both overbid and closed within a day following strong demand from institutional and high net worth investors in Australia.

The Company is now well-funded to deliver an exciting period of growth and transformation centred around its rapidly emerging Cortadera copper-gold discovery in Chile, with key catalysts over the coming six months to include:

- Commencement of first production from the Company's Productora copper project in partnership with the Chilean government agency ENAMI
- First resource estimates for Cortadera and then San Antonio
- Completion of metallurgical testwork across Cortadera and San Antonio
- Completion of internal scoping studies into a large combined development scenario

Funds raised will also be used to continue the Company's diamond drilling programme aimed at expanding Cortadera toward a second resource estimate.

A general meeting to approve several resolutions related to the recent Placement and Entitlements offer was held on 26th June. All resolutions were approved.

Payments to related parties of the entity and their associates during the quarter totalled \$409,000. This was made up of fees and salaries of AUD\$173,000, rent of AUD\$7,000 and drilling costs of AUD\$229,000 was paid to Blue Spec Sondajes (an entity controlled by Murray Black).

About Cortadera

Cortadera is a privately-owned, major copper-gold porphyry discovery located along the Chilean coastal range, where historical world-class discovery drill results have only recently been publicly released by Hot Chili in February 2019.

Importantly, Cortadera lies 14km from the Company's large-scale Productora copper development and adjacent to the high grade El Fuego satellite copper projects, as displayed in Figure 6 below.

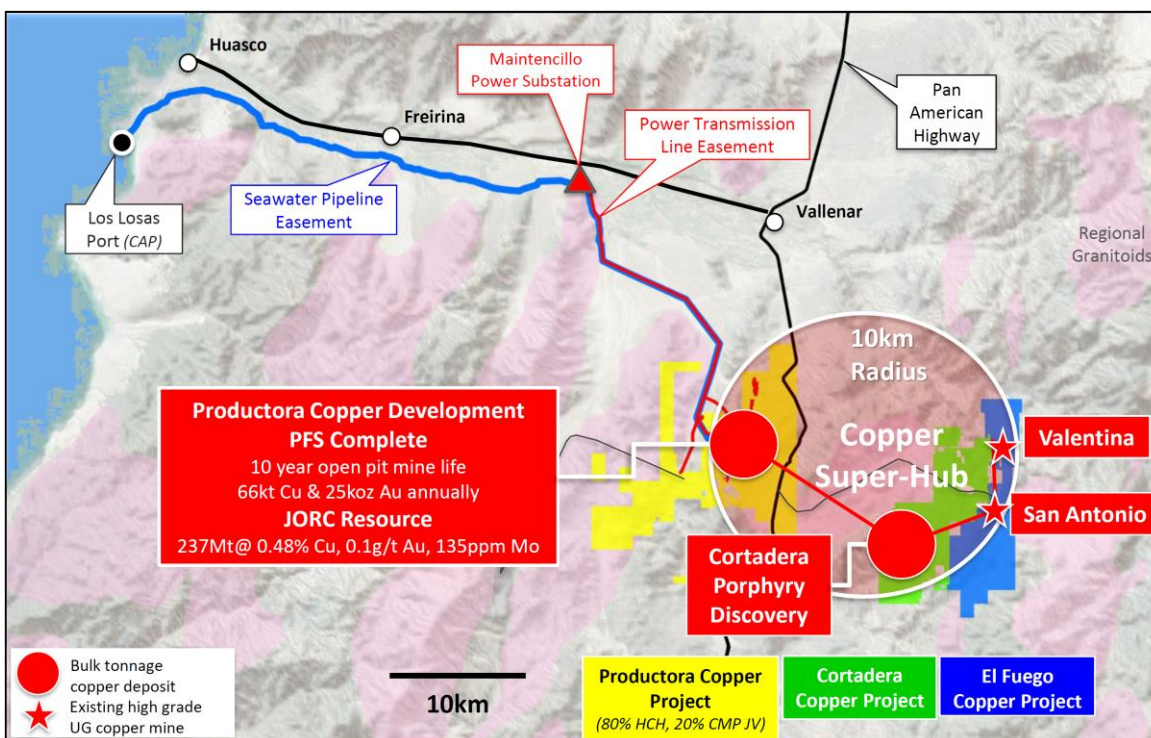

Figure 2. Location of Productora and the Cortadera discovery in relation to the consolidation of new growth projects and coastal range infrastructure

On 22 February 2019, Hot Chili announced the execution of a formal Option Agreement to acquire a 100% interest in Cortadera. In early April, the Company commenced a confirmation drilling programme comprising 17 holes.

The drilling has confirmed and extended areas of surface enrichment and wide, higher-grade, copper-gold sulphide mineralisation at depth, which had not previously been closed off by 23,000m of historical diamond drilling.

Hot Chili's recent two drill holes at Cuerpo 3 (the largest of the four porphyries discovered to date) include two of the best intercepts to date at the project and rate as some of the worlds' stand-out copper-gold porphyry drill results ever recorded globally. The Cuerpo 3 porphyry remains open to the north, south and at depth. Significant intersections (refer to ASX announcement 16th October 2019) include:

- 972m grading 0.5% copper and 0.2g/t gold from surface (including 412m grading 0.7% copper and 0.3g/t gold)
- 750m grading 0.6% copper and 0.2g/t gold from 204m down-hole depth (including 188m grading 0.9% copper and 0.4g/t gold)
- 848m grading 0.4% copper and 0.2g/t gold from 112m down-hole depth (including 184m grading 0.7% copper and 0.3g/t gold)
- 864m grading 0.4% copper and 0.1g/t gold from 62m down-hole depth (including 348m grading 0.6% copper and 0.2g/t gold),
- 649m grading 0.4% copper and 0.1g/t gold from 328m down-hole depth (including 440m grading 0.5% copper and 0.2g/t gold), and
- 596m grading 0.5% copper and 0.2g/t gold from 328m down-hole depth (including 184m grading 0.7% copper and 0.3g/t gold)
- 542m grading 0.5% copper and 0.2g/t gold from 422m down-hole depth, (including 218m grading 0.7% copper and 0.2g/t gold)

Note: Please refer to ASX announcement "Another Record Step-Out Drill Result at Cortadera" 20th March 2020 for Table 1 information relating to the reporting of exploration results, data and sampling techniques

Cortadera is shaping up as a globally significant standalone copper-gold project which can utilise the Productora project resources, and leverage from a central processing and combined infrastructure approach along the coastline of Chile.

The Company's recent discovery and definition of a higher grade bulk tonnage underground development opportunity in combination with shallow, high grade bulk tonnage open pit sources - places Cortadera in a unique position amongst potential large-scale global copper-gold developments.

Health, Safety, Environment and Quality

Hot Chili's sustainability framework ensures an emphasis on business processes that target long-term economic, environmental and social value. The Company is dedicated to continual monitoring and improvement of health, safety and the environmental systems.

Importantly, the Company has implemented COVID safety measures and procedures to ensure the safety of its staff, consultants and contractors during these challenging times. This was of paramount importance for allowing a re-commencement of drilling activities during the quarter.

While the Company sees these measures as temporarily impacting productivity at its operations, there is no greater importance than ensuring the safety of our people and their families.

The company is pleased to report that there were no incidents recorded for the quarter. Field operations during the period including geological reconnaissance activities, RC and diamond drilling, field mapping and sampling exercises at the Cortadera project.

The Company's HSEQ quarterly performance is summarised below:

Table 2 HSEQ Quarter 2 2020 Performance and Statistics

Item	PRODUCTORA		CORTADERA	
	April-June 2020	Last 24 Months	April-June 2020	Last 12 Months

Mineral Resource and Ore Reserve Confirmation

The information in this presentation that relates to Mineral Resources, Ore Reserve estimates and Production Targets on the Productora copper project was previously reported in the ASX announcement “Hot Chili Delivers PFS and Near Doubles Reserves at Productora” dated 2nd March 2016, a copy of which is available on the ASX website at www.asx.com.au and the Company’s website at www.hotchili.net.au. The company confirms that it is not aware of any new formation or data that materially affects the information included in the original market announcement and that all material assumptions and technical parameters underpinning the estimates in that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.

Competent Person’s Statement- Exploration Results

Exploration information in this Announcement is based upon work compiled by Mr Christian Easterday, the Managing Director and a full-time employee of Hot Chili Limited whom is a Member of the Australasian Institute of Geoscientists (AIG). Mr Easterday has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a ‘Competent Person’ as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (JORC Code). Mr Easterday consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.

Competent Person’s Statement- Mineral Resources

The information in this Announcement that relates to the Productora Project Mineral Resources, is based on information compiled by Mr J Lachlan Macdonald and Mr N Ingvar Kirchner. Mr Macdonald is employed by AMC Consultants (AMC), and is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr Kirchner is employed by AMC Consultants (AMC). AMC has been engaged on a fee for service basis to provide independent technical advice and final audit for the Productora Project Mineral Resource estimates. Mr Kirchner is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM) and is a Member of the Australian Institute of Geoscientists (AIG). Both Mr Macdonald and Mr Kirchner have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (the JORC Code 2012).

Competent Person's Statement- Ore Reserves

The information in this Announcement that relates to Productora Project Ore Reserves, is based on information compiled by Mr Carlos Guzmán, Mr Boris Caro, Mr Leon Lorenzen and Mr Grant King. Mr Guzmán is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM), a Registered Member of the Chilean Mining Commission (RM- a 'Recognised Professional Organisation' within the meaning of the JORC Code 2012) and a full time employee of NCL Ingeniería y Construcción SpA (NCL). Mr Caro is a former employee of Hot Chili Ltd, now working in a consulting capacity for the Company, and is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM) and a Registered Member of the Chilean Mining Commission. Mr Lorenzen is employed by Mintrex Pty Ltd and is a Chartered Professional Engineer, Fellow of Engineers Australia, and is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr King is employed by AMEC Foster Wheeler (AMEC FW) and is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM). NCL, Mintrex and AMEC FW have been engaged on a fee for service basis to provide independent technical advice and final audit for the Productora Project Ore Reserve estimate. Mr. Guzmán, Mr Caro, Mr Lorenzen and Mr King have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.

Forward Looking Statements

This Announcement is provided on the basis that neither the Company nor its representatives make any warranty (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in the Announcement and nothing contained in the Announcement is, or may be relied upon as a promise, representation or warranty, whether as to the past or the future. The Company hereby excludes all warranties that can be excluded by law. The Announcement contains material which is predictive in nature and may be affected by inaccurate assumptions or by known and unknown risks and uncertainties and may differ materially from results ultimately achieved.

The Announcement contains "forward-looking statements". All statements other than those of historical facts included in the Announcement are forward-looking statements including estimates of Mineral Resources. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statement" to reflect events or circumstances after the date of the Announcement, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. All persons should consider seeking appropriate professional advice in reviewing the Announcement and all other information with respect to the Company and evaluating the business, financial performance and operations of the Company. Neither the provision of the Announcement nor any information contained in the Announcement or subsequently communicated to any person in connection with the Announcement is, or should be taken as, constituting the giving of investment advice to any person

| 6.1 | Aggregate amount of payments to related parties and their associates included in item 1 | 409 |
| 6.2 | Aggregate amount of payments to related parties and their associates included in item 2 | - |

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

+Rule 5.5

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i>		
<i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	(1,241)
8.2 Capitalised exploration & evaluation (Item 2.1(d))	(2,949)
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	(4,190)
8.4 Cash and cash equivalents at quarter end (Item 4.6)	6,206
8.5 Unused finance facilities available at quarter end (Item 7.5)	-
8.6 Total available funding (Item 8.4 + Item 8.5)	6,206
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	1.5*
8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:	
1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
<p>Answer: Yes. * Note that Item 2.1d (\$2,949,000) was a one-off tenement related payment for the 12 month extension fee of the Carola agreement (that was capitalised) and is not expected as an ongoing quarterly expenditure item. Owing to this, the Company considers it has significantly higher quarters of funding available than outlined above in 8.7</p>	
2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
<p>Answer: Interest in the Company's Cortadera transaction continues. The company believes the strategic funding process will ultimately be successful. Lease mining and processing by ENAMI at Productora have begun and will be a source of working capital going forward.</p>	
3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	

Answer: Yes. The Company continues to consolidate results and ultimately aim to deliver a resource for Cortadera and San Antonio. Any drilling will be targeted and cost effective and funded by working capital sourced from mining operations.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date:30 July 2020.....

Authorised by:By the Board.....
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
